

## **NETS SET**

### **INSECT NET, self – adhesive**

Fly – net, safe and harmless protect against insect, such as flies, wasps, mosquitoes, spiders, moths. The nets guarantee fresh air and undisturbed sleep. The net into the window is very immovable and resistant against weather impacts, it is easy to put and remove, for example when washing (30°) or in winter.

Net 150x130cm

### **Self-adhesive tape 5,6m**

The tape is possible to stick on all window and door profiles and we can remove it anytime. The painted frames have to be smooth properly. The tape can stay on the window frame in winter. When having a window with salient down part of the frame, it is necessary to unfasten the down part of the net before closing the window.

**Save protect against flies, mosquitoes, moths, spiders and other insect. Easy fitting, removable, washable.**

### **Fitting:**

1. Open the window and clean the inside frame with the technical petrol or alcohol properly.
2. Fit the adhesive tape around the window frame, cut in the corners and press.
3. Stretch out the net and press on the adhesive tape.
4. Cut off the overhung netting.
